HIMAANK GOYAL

LINUX ADMIN & DEVOPS PROFESSIONAL

CONTACT

+91-7597548730

Himaankgoyal93@gmail.com

Bangalore Karnataka

CORE COMPETENCIES

Linux Administration
Troubleshooting
Backup & Recovery
Cloud Computing
Agile Methodology
Application Lifecycle Management
Performance Tuning
Network Configuration
CI/CD Pipelines
DevOps-Build & Release

TECHNICAL TOOLS

Infra Monitoring: Nagios, Grafana, Prometheus, Kibana.

Database: MySQL, MongoDB, Redis

Web Server: Nginx, Apache

Scripting Languages: Bash(shell)

A**utomation Tools:** Jenkins, Docker, Ansible

Version Control System: Git, Gitlab, Bitbuckrt

Cloud Computing: AWS, EC2, S3, IAM

L**oad Balancer:** F5 BIG-IP

Logs Management: ELK & Grafana

OS: CentOS, Ubuntu, Debian, Fedora

Troubleshooting: Top, Free, Ping, Netstat

Ticketing: Jira, Taiga & Helpdesk

PROFILE

Experienced and enthusiastic Linux Administrator and DevOps Professional with 4+ years experience. Proficient in Linux server administration, automation, and deployment strategies. Skilled in utilizing DevOps tools to streamline workflows, enhance scalability, and optimize performance. Adept at collaborating with cross-functional teams to drive continuous improvement and deliver high-quality solutions.

WORK EXPERIENCE

LINUX SYSTEM ADMINISTRATOR

Justdial Limited **August 2022-Present (Bangalore)**

- **Linux Administration:** Proficiently handling daily Linux administration tasks, including user account management, file system sharing facilitation, permission control, system patching orchestration, and package management utilizing apt, rpm, and yum tools.
- **Data Synchronization:** Expertly conducting data synchronization operations employing Rsync, LFTP, and SCP to ensure data security by backing up data from production servers to staging servers, migrating data between servers, and restoring data from backups.
- **Database Administration:** Spearheading database administration responsibilities, such as query execution, database table restoration using the MySQL dump utility, provisioning MySQL privileges for DB Users & Developers, and resolving MySQL replication issues.
- **MongoDB Management:** Proficiently managing MongoDB privileges, including user management (creation, updates, deletions), executing data dump and restore operations on MongoDB servers, and managing primary & secondary servers within clusters.
- **Shell Scripting:** Skillfully optimizing shell scripts to automate various tasks, including backup optimization, log gathering, CPU & disk utilization monitoring, and operational streamlining.
- **DevOps Practices:** Competently handling installation, configuration, packaging, and deployment of applications within Docker containers and Docker Compose Environments; utilizing Ansible for system configuration orchestration and provisioning multiple servers based on project requirements using Ansible playbooks.
- **Cloud Computing:** Successfully establishing, upgrading, maintaining, migrating, monitoring, and enhancing system performance within cloud environments.
- **Monitoring and Alerting: I**mplementing a robust infrastructure utilizing Nagios, Grafana, and Prometheus for real-time server monitoring and proactive incident alerts, resulting in a 40% reduction in downtime and ensuring uninterrupted service availability.
- **Performance Monitoring:** Diligently monitoring system resource utilization, including CPU, memory, disk, and swap space, to mitigate performance bottlenecks.
- **Logging and Visualization:** Assisting in the management, analysis, and visualization of logs using ELK (Elasticsearch, Logstash, and Kibana) and Grafana tools.
- **Load Balancing:** Proficiently managing the migration and troubleshooting of servers with F5 load balancer configurations.
- **Cloud Storage Management:** Strategically formulating and managing critical data on Amazon EC2 instances, while efficiently uploading and retrieving data from S3 Glacier storage.

EDUCATION

Bachelor of Technology

Arya College of Engineering and I.T.

Graduated: 2018

LANGUAGE

ENGLISH

HINDI

PERSONAL DETAILS

Date of Birth: 9th OCTOBER 1993

Address: Manyata Tech Park, Bengaluru Nagawara-560045

JR. CLOUD ENGINEER

DocheioCloud (KansoCloud) **August 2021-2022 (Udaipur)**

- **Frontend and Backend Server Migration:** Proficiently conducted hands-on migration of both frontend and backend servers.
- **Database Server Maintenance:** Effectively managed MySQL and MongoDB database servers, including database and table creation, user access management, backup and restoration, and troubleshooting.
- **Automation with Jenkins and Ansible:** Created Jenkins and Ansible jobs to automate various processes, enhancing efficiency and reliability.
- **Ticketing Tools Management:** Utilized JIRA/TAIGA ticketing tools to track and prioritize issues according to SLA on a daily basis, ensuring timely resolution.
- **Scheduled Jobs with Cronjob:** Implemented automatic job scheduling using Cronjob to streamline recurring tasks.
- **Oracle Key Vault Endpoint Management:** Successfully worked on creating new endpoints and migrating endpoints on Oracle Key Vault.
- **Server Monitoring Expertise:** Proficiently utilized Nagios, Datadog, Kibana, Prometheus, and Grafana for monitoring Linux servers, ensuring optimal performance and reliability.
- **ELK Stack Setup:** Set up new ELK Stack, frontend, and backend servers, installing necessary packages based on requirements.
- **Bash Scripting:** Demonstrated scripting knowledge in Bash, including creating scripts related to MySQL, MongoDB, and stored procedure calls, streamlining various processes.
- **VMware Management:** Utilized VMware using V Sphere for virtualization management and maintenance tasks.
- **Problem Resolution and Escalation:** Successfully resolved issues and escalated problems with knowledgeable support, ensuring quality service delivery.

LINUX SYSTEM ADMINISTRATOR

Netzary Infodynamics (Skilledanswers Infosolutions Pvt. Ltd.)

March 2020-2021 (Bangalore)

- **Server Environment Deployment:** Proficiently deploy and maintain diverse server environments encompassing CentOS, Redhat, Ubuntu, and Windows.
- **Web Server Setup and Optimization:** Skilled in setting up and optimizing web servers like Apache and Nginx, including virtual hosting configuration.
- **Performance Issue Resolution:** Tasked with diagnosing and resolving performance issues, monitoring disk usage, and addressing memory-related concerns to ensure optimal server performance.
- **Change Request Management:** Proficiently generate Change Requests for server configuration modifications and efficiently execute them to meet organizational requirements.
- **Memory Management Expertise:** Possess a foundational comprehension of swap configuration and adeptly manage memory resources to optimize system performance.
- **Data Security Implementation:** Demonstrated expertise in implementing robust data security measures through permission policies and proficiently managing User and Group Administration to safeguard organizational data.
- **High Availability Cluster Configuration:** Experienced in the installation and configuration of High Availability Clusters to enhance system reliability and ensure continuous availability.
- **Remote Access and Troubleshooting:** Proficient in remote access and troubleshooting procedures utilizing SSH to efficiently address system issues and ensure smooth operations.
